ABOUT NARAL PRO-CHOICE COLORADO

NARAL Pro-Choice Colorado (NPCC) is the political action arm of the pro-choice movement in Colorado. NPCC works in the following areas:

- Grassroots organizing
- Lobbying
- Electoral work for pro-choice candidates and ballot issue campaigns
- Public education and community outreach
- Policy and education initiatives to improve access to reproductive health care services

We have over 30,000 supporters and maintain a list of more than 150,000 identified pro-choice voters across the state. To learn more about our work, please visit **www.ProChoiceColorado.org**.

ABOUT THE ACCESS PROJECT

The Access Project was launched in 2002 by NARAL Pro-Choice Colorado to preserve and improve access to reproductive health care services for women and men in Colorado. The goals of the Access Project include creating an accurate assessment of reproductive health services in Colorado, educating the public regarding the full range of reproductive choices and mobilizing communities to create positive change and improve access to reproductive health services.

Please visit our website, **www.ProChoiceColorado.org**, to download copies of our other bilingual publications: *Your Choices: A Guide to Reproductive Health Care Services in Colorado* and *Thinking about Sex? What Teens Should Know about Reproductive Health Care*. Or call 303.394.1973 to order FREE copies.

DISCLAIMER

The purpose of this guide is to inform and educate. It is not meant to replace the advice of a medical professional. The data is current as of August 31, 2005, but the accuracy of the information and the quality of the services listed in this guide are not within our control. In addition, the clinics and pharmacies featured in this guide are not endorsed by NARAL Pro-Choice Colorado, nor does their inclusion in this resource indicate their endorsement of us.

20 FACTS YOU SHOULD KNOW ABOUT EMERGENCY CONTRACEPTION (EC)

#1: What is emergency contraception?

Emergency contraception (EC), often known as the “morning-after pill,” is taken to prevent pregnancy after unprotected sex. It works best if it is used as soon as possible, but it can be taken up to 72 to 120 hours (three to five days) after unprotected sex.

#2: What types of EC are there?

Plan B®: Plan B is the only product on the market that is intended solely as emergency contraception. Plan B consists of two pills that contain progestin (levonorgestrel), a synthetic hormone used in many birth control pills. One pill is taken as soon as possible after unprotected sex, the other twelve hours later. Recent studies have shown that women can take *both* pills at the same time, with no increased side effects or decreased efficacy.

Regular Birth Control Pills: Certain brands of daily birth controls pills can also be used as EC. Please consult the chart below. The dosages and colors listed are for brand-name pills *only*. If you have generic pills, consult with your health care provider to get the proper dosage.

<u>PILL BRAND</u>	<u>FIRST DOSE</u> <i>Take as soon as possible, within 120 hours</i>	<u>SECOND DOSE</u> <i>Take exactly 12 hours after first dose</i>
Combination estrogen-progestin pills		
Alesse®	5 pink pills	5 pink pills
Aviane™	5 orange pills	5 orange pills
Levlen®	4 light-orange pills	4 light-orange pills
Levlite™	5 pink pills	5 pink pills
Levora®	4 white pills	4 white pills
Low-Ogestrel®	4 white pills	4 white pills
Lo/Ovral®	4 white pills	4 white pills
Nordette®	4 light-orange pills	4 light-orange pills
Ogestrel®	2 white pills	2 white pills
Orval®	2 white pills	2 white pills
Tri-Levlen®	4 yellow pills	4 yellow pills
Triphasil®	4 yellow pills	4 yellow pills
Trivora®	4 pink pills	4 pink pills
Progestin-only pills		
Ovrette®	20 yellow pills	20 yellow pills

If you currently take birth control pills or have them in your medicine cabinet, check the expiration date and consult a clinician before taking them.

The Copper-T IUD: The IUD (intrauterine device) may be inserted by a clinician up to 120 hours (five days) after unprotected sex for use as emergency contraception. *The clinic directory in this resource guide is meant for access to emergency contraceptive pills only, not IUD insertion.* Please consult with your health care provider for more information about this option.

#3: How does EC work?

EC can work in several ways. They include:

- Stopping the ovary from releasing an egg.
- Thickening the mucus in the cervix so sperm can't get through.
- Changing the lining of the uterus so that a fertilized egg can't attach and become a pregnancy.

#4: When should EC be used?

There are many instances when you may need EC. Some examples include:

- The condom broke or slipped off.
- You forgot to take your birth control pill(s), or you started the pack late.
- You were one week (or more) late for your Depo-Provera® shot.
- Your IUD fully or partially expelled.
- He didn't pull out in time, or he ejaculated on the outside of your vagina.
- You did not realize you had to use protection the first time you had sex.
- You were under the influence of alcohol or other substances and do not know if you had sex and if you used protection.
- You did not communicate well with your partner, and it was unclear to him that you were not on birth control.
- You were sexually assaulted or raped.

#5: Does EC cause an abortion?

No. EC should not be confused with Mifeprex® (RU 486), which is commonly known as “medical abortion” or “the abortion pill.” EC *prevents* a potential pregnancy and will not work if you are already pregnant. Mifeprex, on the other hand, terminates an existing pregnancy up to nine weeks. If you are interested in finding out more about medical abortion options, please visit **www.ProChoiceColorado.org** and click on *Your Choices: A Guide to Reproductive Health Care Services in Colorado*. Or call 303.394.1973 to order a free copy of the guide.

#6: Does EC have side effects?

Some women have mild and temporary side effects with EC. Side effects are less common with Plan B than they are with birth control pills. (Plan B contains only progestin, while many birth control pills contain progestin and estrogen, a combination that is more likely to cause side effects.)

Side effects can include:

- Upset stomach or vomiting
- Headache or dizziness
- Sore breasts
- Spotting (drops of blood in your underwear) or irregular bleeding

You may have less trouble with nausea if you take EC with food and liquids. If you have vomited the pills, get another dose and take it with an anti-nausea medication recommended by your health care provider.

#7: How effective is EC?

EC is *not* 100 percent effective. It works about 75 to 89 percent of the time, depending on which method you use, when during your cycle you had unprotected sex and how soon you take EC after unprotected sex. The sooner you take EC, the more effective it is. *The first twenty-four hours are crucial.*

#8: Who should *not* use EC?

EC is safe and effective for most women. You should *not* take EC if:

- You are already pregnant, because EC will not work.
- You are allergic to any of the ingredients in Plan B or birth control pills.
- You have abnormal vaginal bleeding that has *not* been evaluated by a health care professional.

#9: What are the advantages and disadvantages of using EC?

Advantages

- EC can prevent pregnancy up to 72 to 120 hours (three to five days) after unprotected sex.
- Almost any woman can take EC.
- EC has the potential to prevent unintended pregnancies *and* abortions.

Disadvantages

- EC offers no protection from sexually transmitted diseases (STDs). *If you have had unprotected sex, it is important that you get tested for STDs, including HIV.* Please visit

www.ProChoiceColorado.org and click on *Your Choices: A Guide to Reproductive Health Care Services in Colorado* to find an STD/HIV testing site near you.

- EC is less effective than correct and regular use of birth control methods. EC *should not* be used to replace the regular birth control methods that are available.
- Although mild and temporary, there are some side effects.

#10: What if I have taken EC and I'm already pregnant or become pregnant?

Emergency contraception will not work if you are already pregnant—that is, EC will *not* cause a miscarriage or abortion. The American College of Obstetricians and Gynecologists (ACOG) has stated that EC is ineffective once a fertilized egg has implanted in the uterus. Furthermore, studies have shown that EC *will not* harm a developing fetus.

#11: When should I expect my period?

After you take EC, you should get on a reliable method of birth control if you are not already. Your next period could be early or late, and it could be light or heavy. Visit your health care provider if:

- Your period does not start within four weeks after taking EC.
- You think you are pregnant or have signs of pregnancy, like nausea, fatigue and/or breast tenderness.

If you suspect you are already pregnant, or if EC fails and you become pregnant, you should visit your health care provider. The NARAL Pro-Choice Colorado website also has information that you might find helpful. Visit www.ProChoiceColorado.org and click on *Your Choices: A Guide to Reproductive Health Care Services in Colorado*. Or call 303.394.1973 to order a free copy of the guide.

#12: Why should I keep a supply of EC on hand?

Because EC is more effective the sooner it is taken after unprotected sex, medical and health professionals strongly urge that you obtain an advance prescription of EC to keep on hand in case you should ever need it. Any physician, physician's assistant, nurse practitioner or nurse midwife can write a prescription for EC.

Most EC will keep for a long time; Plan B's shelf life is forty-eight months (four years) from the date of manufacture. The shelf life of birth control pills varies by brand. Always check the expiration date on the packaging!

#13: How much does EC cost?

This depends on whether you receive EC directly from a clinic or get your prescription filled at a pharmacy. Our research has found that the cost can vary, but the average price is about \$32.00 for *only* the emergency contraceptive pills. (Please contact the clinic directly to find out if there is an additional cost for an office visit, exam, etc.)

NOTE: At Planned Parenthood clinics or public health departments, you can often get EC directly at a low or reduced cost, depending on your financial need.

#14: Will my insurance company reimburse me for EC?

Reimbursement for EC, like reimbursement for other prescription contraceptives, varies greatly. Many HMOs and private insurance plans cover the cost of contraceptives; others do not. Generally speaking, if your insurance company covers the cost of oral contraceptives, it will also cover the cost of EC. *Check your plan now, so you know whether Plan B or birth control pills are covered.*

#15: Does Medicaid reimburse for EC?

In Colorado, Plan B is *not* covered by Medicaid, but birth control pills are.

#16: Can I get EC on the web?

In addition to the clinics and pharmacies listed in this guide, www.getthepill.com provides prescriptions for emergency contraception. After taking a medical history to determine eligibility, this online service will phone in a prescription to a local pharmacy. The cost of the online assessment is \$24.95 and *does not* include the price of pills. (There is no fee if you are denied a prescription.) This website is available twenty-four hours a day; prescriptions are only submitted from 9 am to 8 pm (EST) Monday through Friday and from 9 am to 6 pm (EST) Saturday and Sunday. You must be a U.S. resident and at least eighteen years or older to use this service.

#17: If I'm under 18, do I have to get my parent's permission to take EC?

No. In Colorado, women under the age of eighteen have the legal right to access birth control services, including EC, *without* the consent or notification of a parent. There are a number of teen clinics listed in this guide that specialize in confidential care for young women.

#18: What should I do if I have been raped or sexually assaulted?

If you have been raped or sexually assaulted, EC can help to prevent the additional trauma of an unintended pregnancy.

If you have been assaulted, please:

- Get to a safe place.
- Call 911.
- Do not bathe, brush your teeth, use mouthwash, douche or wash your clothing (to avoid disturbing DNA evidence).
- Call a friend or family member to be with you.
- Call a rape crisis line for support, information and referrals.

If you do choose to report a rape, it is best to go to your local hospital immediately to have a sexual assault exam. Some Colorado hospitals have trained medical staff called Sexual Assault Nurse Examiners (SANE), who provide rape survivors with a comprehensive exam. The SANE exam includes collection of bodily evidence, treatment for STDs and referrals for counseling and/or additional emotional support. *You should be offered EC during the exam. If you are not given the option of taking EC, please ask about it.*

- **For a list of SANE programs in Colorado, please visit www.sane-sart.com and click on the “SANE Program Locator.”**
- **For a list of Colorado rape crisis centers and hotlines, please see www.ccasa.org/hotlines.cfm.**

#19: What should I do if the pharmacy does not have EC?

If the pharmacy you are visiting does not have Plan B, you have three options:

- Have the pharmacy place an overnight order for the medication (most pharmacies can have medication delivered within twenty-four hours).
- Find another pharmacy that *does* stock Plan B.
- Call your health care provider and get a prescription for birth control pills that can be used for EC, then have the pharmacy fill that prescription.

NOTE: Wal-Mart pharmacies will not stock or dispense Plan B. However, Wal-Mart *will* fill prescriptions for birth control pills, of which certain brands can be used as EC. Our research shows no policy restrictions on dispensing EC prescriptions at other major chain or supermarket drugstores.

#20: What should I do if the pharmacist refuses to fill my prescription?

Pharmacists have the right to refuse to fill any prescription or dispense any medication. Some pharmacists may refuse to dispense EC based on their moral or religious objections, while others simply may not stock Plan B because of a lack of demand. Under current laws, pharmacists are also not obligated to provide a referral for a pharmacy that will fill the prescription.

We would hope that a pharmacist's rights would not override the patient's right to treatment. Although pharmacists may excuse themselves from situations for personal reasons, they should work to ensure that patients receive needed services.

The APhA (American Pharmacists Association) has a protocol in place that supports the right of pharmacists to refuse a prescription; however, these polices clearly state that it is the responsibility of the pharmacist to ensure an alternative system so that the patient has access to legal medication.

If the pharmacist refuses to fill your prescription for EC, you have two options:

- Ask if another pharmacist at the same pharmacy will fill the prescription.
- Ask for a referral to another pharmacy in the area that will fill the prescription (or look for another nearby pharmacy in this guide).

If you encounter a situation where a pharmacist refuses to fill your prescription, takes your prescription from you and/or refuses to provide you with a referral to a pharmacy that will fill the prescription, please contact NARAL Pro-Choice Colorado at 303.394.1973 or choice@ProChoiceColorado.org.

DIRECTORY OF COLORADO CLINICS AND PHARMACIES WHERE EMERGENCY CONTRACEPTION IS AVAILABLE

How to Use This Directory:

- Locate the name of the city where you live.
- Clinics and pharmacies are listed alphabetically under each city.
- If your city is not listed, look for another city near you.
- Please see the key (below) for more information about that specific clinic or pharmacy.
Call the telephone number of the clinics/pharmacies you have identified for more information.

Clinic Key

- DO:** Clinic dispenses EC on-site
Rx: Clinic provides prescription for EC to be filled at a pharmacy
T: Call for exam requirements
W: Clinic has weekend/after-hours access to EC
S: Spanish translation/support services available

Pharmacy Key

- BC:** Pharmacy fills birth control prescriptions only
O: Pharmacy can order Plan B® for delivery within 24 hours
24/7: Pharmacy open 24 hours day/7 days a week
M: Pharmacy fills EC prescriptions for network members only
S: Spanish translation/support services available

TELL US WHAT YOU THINK

Help us provide Coloradans with current information about EC! Tell us what you think about this guide, and notify us if any information is incorrect. We also encourage health care providers and pharmacies who wish to be included in this guide (including our online version at www.ProChoiceColorado.org) to contact us at 303.394.1973 or choice@ProChoiceColorado.org.

MISSION STATEMENT

The mission of NARAL Pro-Choice Colorado is to develop and sustain a constituency that uses the political process to guarantee every woman the right to make personal decisions regarding the full range of reproductive health choices, including preventing unintended pregnancies, bearing healthy children and choosing legal abortion.
