

Should extremists define a fertilized egg as a person in the Colorado Constitution?

Amendment 62 has far-reaching consequences for important life decisions.

- Amendment 62 bans emergency contraception, abortion, birth control and in-vitro fertilization – including in cases of rape, incest and when the life of the mother is at risk. These are decisions that should be made by individuals, their doctors and their families.
- The vague language would make one religious viewpoint the law of the land when it comes to reproductive health care. Every individual should be able to make up their own minds according to their own beliefs.

Amendment 62 will impact literally thousands of laws and put politicians, lawyers, and courts into our personal lives and private life decisions.

- Amendment 62 will clog our courts by allowing lawsuits against everyone associated with a woman's health care, including her doctors, nurses and pharmacists.
- It would create a legal nightmare in our constitution because it would affect everything from when property rights are granted, to inheritance rights, to access to the courts.

Vote NO on Amendment 62

The No on 62 Campaign is a broad-based coalition of nurses, doctors, religious leaders, community groups, medical researchers, and health advocacy organizations.
