*The Colorado Pregnancy Risk Assessment Monitoring System (PRAMS) measures respondents' attitudes toward pregnancies resulting in live births; "unintended pregnancies" includes pregnancies that women characterized as either not wanted at any time (unwanted) or not wanted until some time in the future (mistimed). *Because PRAMS measures respondents' attitudes only toward pregnancies resulting in live births, unintended pregnancy rates above DO NOT reflect pregnancies that ended in abortion or miscarriage. It is generally accepted that the majority of pregnancies ending in abortion are unintended or unwanted pregnancies, so PRAMS data under-reports the percentage of unwanted or unintended pregnancies experienced by women in Colorado.*

**Rates are unavailable for Archuleta and other counties marked with "-" because of the small number of respondents.

***PRAMS does not provide data for Broomfield County
